

# KAZUYA *UNLEASHED*

# INSTALLATION

To use this moveset, you are going to need the [TekkenMovesetExtractor](#) *(major credits to Kiloutre for making this tool).*

You can find this here -

<https://github.com/Kiloutre/TekkenMovesetExtractor/releases>

After downloading from this page, unzip the folder and keep it somewhere you will remember it.

Then, find the [extracted\\_chars](#) folder within this package and paste it into the folder containing [TekkenMovesetExtractor.exe](#).

Once this is done, run Tekken 7 and [TekkenMovesetExtractor.exe](#).

Start a practice match with Kazuya against any opponent.

Then, while the game is still running, switch to [TekkenMovesetExtractor](#).

Select [Export: Tekken7: Player 1](#) then copy all of the files in [extracted\\_chars/t7\\_KAZUYA/anim/](#) and paste them into [extracted\\_chars/KazuyaUnleashed/anim](#).

Restart [TekkenMovesetExtractor.exe](#) then select [KazuyaUnleashed](#) from the dropdown in the middle of the page, and [Import to P1](#).

The tool should respond with [Successfully imported KazuyaUnleashed !](#)

At this point, the mod has been installed correctly – just have a mess around with it.

For more info on the [TekkenMovesetExtractor](#), view the readme here -

<https://github.com/Kiloutre/TekkenMovesetExtractor#readme>

Below you can find new moves added in this mod – have a go and see what cool combos you can come up with.

# USING THE COMMAND LIST

The command list below follows the same notation used in Tekken 7. Most of Kazuya's moves have stayed the same with few exceptions.

These are the following properties a move can have:

Armour

Homing

Tailspin

Cyclone

The **Cyclone** is a high launcher that is used for extending combos – allowing Kazuya to close distance when racking up combo hits.

Agony Spear (Slaughter Stance)

Demon Sickle

Returning Blade

Withheld Slaughter (Slaughter Stance)

Rising Wave

Deceiver

Rampaging Slaughter (Slaughter Stance)

Slaughter Stance

Orbital Slash
